A Rule 30.10 firm must satisfy the same requirements, except that it may provide each foreign futures or foreign options customer with a comparable disclosure statement prescribed by its home regulator.

7. If an FCM or Rule 30.10 firm fails to receive the required acknowledgment from the initial depository or provide the above written disclosure statement (and in certain circumstances, receive from customers and acknowledgment of receipt), then it must set aside funds with an acceptable depository and receive from such depository the required acknowledgment.

8. The Commission's interpretation of the Rule 30.7 secured amount requirement will apply to all regulated activities with all new and existing foreign futures and foreign options customers as of October 11, 2000. The Commission's interpretation does not alter any other requirement set forth in Rule 30.7 or any other section of part 30.

#### APPENDIX D TO PART 30—COMMISSION CERTIFICATION WITH RESPECT TO FOREIGN FUTURES AND OPTIONS CONTRACTS ON A NON-NARROW-BASED SECURITY INDEX

In its analysis of a request for certification by a foreign board of trade relating to a security index futures contract traded on that foreign board of trade pursuant to § 30.13, the Commission will evaluate the contract to ensure that it complies with the three criteria of section 2(a)(1)(C)(ii) of the Act.

(1) Because security index futures contracts are cash settled, the Commission also evaluates the contract terms and conditions

relating to cash settlement. In that regard, the Commission examines, among other things, whether the cash price series is reliable, acceptable, publicly available and timely; that the cash settlement price is reflective of the underlying cash market; and that the cash settlement price is not readily susceptible to manipulation. In making its determination, the Commission considers the design and maintenance of the index, the method of index calculation, the nature of the component security prices used to calculate the index, the breadth and frequency of index dissemination, and any other relevant factors.

(2) In considering the susceptibility of an index to manipulation, the Commission examines several factors, including the structure of the primary and secondary markets for the component equities, the liquidity of the component stocks, the method of index calculation, the total capitalization of stocks underlying the index, the number, weighting and capitalization of individual stocks in the index, and the existence of surveillance sharing agreements between the board of trade and the securities exchange(s) on which the underlying securities are traded.

(3) To verify that the index is not narrow-based, the Commission considers the number and weighting of the component securities and the aggregate value of average daily trading volume of the lowest weighted quartile of securities. Under the Act, a security index is narrow-based if it meets any one of the following criteria:

- (i) The index is composed of fewer than 10 securities;
- (ii) Any single security comprises more than 30% of the total index weight;
- (iii) The five largest securities comprise more than 60% of the total index weight; or
- (iv) The lowest-weighted securities that together account for 25% of the total weight of the index have an aggregate dollar value of average daily trading volume of less than US\$30 million (or US\$50 million if the index includes fewer than 15 securities).
